SOCIOLOGY, EDUCATION AND APPLIED PSYCHOLOGY

THE ROOTS OF FOOD

Societal Changes: Uses of the Past, Strategies for the Present

**International School
Padova, 26-30 April 2016**

The Roots of Food develops the scientific experience of the *Food, Cultures and Societies* research group, participating in the Doctoral Program in Social Sciences and contributing to the activities of the research group *Globi-Lab* at FISPPA. The School adopts an interdisciplinary approach which includes socio-cultural studies and agro-food sciences, and conducts theoretical and applied research. During the five days lectures, seminars and workshops will explore various foodscapes from past to present, showing multicultural and mixed tastes and languages, the mobility in styles of consumption, revealing new forms of conviviality and addressing controversial questions regarding future food security and its sustainability. Furthermore, the program includes visits and meetings with different institutions: Botanical Garden, Agripolis and Camolino Dairy Cooperative. The School also profits from the collaboration with VIU and the Ethnographic Museum of Serravalle.

The five days program is open to Postgraduate students, researchers, scholars and professionals with a high degree of motivation. They are expected to have a strong interest in the topic of critical analysis of food production and consumption.

For the successful completion of the International School students will receive a certificate from the University of Padova.

The number of participants is limited to 25
Good English language skills are required.

Applicants should send a file in pdf format including:

Personal mission statement and research interest (max 300 words), Curriculum Vitae.

Application Deadline: April 18, 2016

Fee: € 250 (includes accommodation and learning materials)
